

DEEPAN P

Python Developer

Tiruchirapalli, Tamil Nadu | deepanprabhakaran@gmail.com | +91 6385744319 | LinkedIn: DEEPAN P

PROFESSIONAL SUMMARY

Python Developer with hands-on experience building full-stack web applications using Django, PostgreSQL, and REST-based backend modules. Skilled in designing responsive front-end interfaces, optimizing database queries, and developing data-driven dashboards. Strong foundation in object-oriented programming, data structures, and machine learning, with a track record of delivering scalable, secure, and maintainable software in cross-functional Agile teams.

TECHNICAL SKILLS

Languages: Python, Java, SQL, HTML, CSS, JavaScript, TypeScript

Frameworks & Libraries: Django, Bootstrap, Chart.js, REST APIs

Databases: PostgreSQL, MySQL

Tools & Platforms: Git, Figma, Power BI, Tableau, AWS (Cloud Practitioner), Postman

Core Competencies: Full-Stack Development, Database Design, Authentication & Role-Based Access Control, Debugging & Optimization, Unit Testing, MVC Architecture, Agile Collaboration, Data Visualization

WORK EXPERIENCE

Full Stack Python Developer | R2S Tech Solutions

Nov 2025 – Present

- Developed and maintained a Warehouse, Storage & Packaging Management System using Python and Django, streamlining inventory tracking, packaging operations, and dispatch workflows for the business.
- Built responsive, cross-browser front-end interfaces with HTML, CSS, Bootstrap, JavaScript, and TypeScript, improving usability across devices.
- Implemented core Django backend modules for inventory management, warehouse allocation, service scheduling, and transport coordination.
- Integrated and optimized PostgreSQL queries to support efficient data retrieval and real-time reporting across modules.
- Built interactive dashboards with Chart.js for stock monitoring, warehouse utilization, and operational performance metrics, giving stakeholders real-time visibility into KPIs.
- Implemented authentication, role-based access control (RBAC), and input validation to strengthen application security.
- Applied clean coding practices, modular architecture, and MVC design principles to improve maintainability and scalability.
- Conducted unit testing, debugging, and performance optimization to ensure application reliability at scale.
- Collaborated with cross-functional teams to gather requirements and deliver features on schedule in an Agile environment.

PROJECTS

Sign Language Detection System using NLP & Machine Learning

- Designed and developed a sign language detection system in Python using computer vision and machine learning techniques.
- Collected and curated a dataset of 3,000+ ASL sign images from 15 participants, supplemented with public datasets.
- Resolved data collection challenges (e.g., lighting variation) through image preprocessing and data augmentation techniques.

- Achieved 85% classification accuracy in recognizing ASL alphabet and words, and published findings in a peer-reviewed journal.

EDUCATION

Bachelor of Computer Science and Engineering

Aug 2020 – Jun 2024

Hindusthan College of Engineering and Technology | CGPA: 8.41/10

SSLC & HSC

Jun 2016 – Mar 2020

R.V.B Matriculation Higher Secondary School | SSLC: 93.8%, HSC: 72.3%

CERTIFICATIONS

- Data Visualisation – IBM (Python, Data Visualisation, Problem Solving, Statistics)
- Power BI for Business Professionals – Infosys
- AWS Certified Cloud Practitioner – Certificate No. 523-26486

JOURNAL PUBLICATION

- "LEARN-UP: Sign Language Detection System" (ISSN No. 2528-3930) – Developed a model detecting sign language gestures using feature extraction and classification techniques.
